Classwize’s role in our Digital Safety and Wellbeing Framework

About our Framework

Our Digital Safety and Wellbeing Framework enables school leaders to explore our solutions as they apply to the three most common pillars found in health and safety planning:

1. Prevention
 2. Early detection
 3. Education.
- Schools can use this, supported by our Linewize team, to identify their priorities and plan the steps needed to achieve a more efficient and robust provision of care.

Our Framework is also a useful way for school leaders to keep abreast of the types of solutions available to them in the market.

It also helps them to better understand the role each of them plays and how they combine to build a digital wellbeing culture across the whole community.

none of us is as powerful as all of us

The role of Classwize

Classwize sits in the Prevention & Enablement part of our Framework.

It protects students from seeing inappropriate or harmful content while giving teachers the tools to

minimize distractions and provide rich and immersive digital learning experiences.

Classwize is a vital component in a proactive, digital safety and wellbeing provision.
